

**Bug Title:** Applying a valid price filter returns empty results

**Environment**

- OS: Windows 11 Pro (build 26200)
- Browser: Chrome 121.x

**Severity:** High

**Priority:** P1

**Preconditions**

- Category page contains products across multiple price ranges

**Steps to Reproduce**

- 1) Open a product category page
- 2) Set a price filter that should match existing items (e.g., 20–50)
- 3) Click Apply

**Expected vs Actual**

**Expected:** List updates showing items within the selected price range.

**Actual:** Page shows “No results found” despite products existing in that range; removing the filter restores results.
