Bug Title: Promo banner overlaps header when scrolling to top

Environment

- OS: Windows 11 Pro (build 26200)

- Browser: Chrome 121.x

Severity: Low

Priority: P4

Steps to Reproduce

1) Open home page

2) Scroll down ~1–2 screens

3) Scroll back to top quickly

Expected vs Actual

Expected: Header stays above content; promo banner sits below header or collapses cleanly.

Actual: Promo banner slides over header; navigation becomes partially covered for ~1–2 seconds.
