Bug Title: Phone number field accepts alphabetic characters without validation

Environment

- OS: Windows 11 Pro (build 26200)

- Browser: Chrome 121.x

Severity: High

Priority: P1

Steps to Reproduce

1) Open checkout / profile form with Phone field

2) Enter value: ABCDEF

3) Move focus out of the field / Submit form

Expected vs Actual

Expected: Field rejects letters or shows validation error; form cannot submit with invalid phone.

Actual: Field accepts letters; form submits successfully with non-numeric phone value.
